PROFESSIONAL SUMMARY

Full-Stack Software Developer with 6+ years of professional experience designing, developing, and maintaining scalable, secure, and high-performance web applications. Strong hands-on expertise in PHP, Laravel, React.js, JavaScript, MySQL, PostgreSQL, Redis, Laravel Cache, Docker, CI/CD, and Golang. Experienced in RESTful APIs, role-based applications, CRM and business portals, advertising platforms, payment and third-party API integrations, database design, caching, application deployment, and production troubleshooting. Experienced in leading development teams and collaborating with cross-functional teams in Agile environments.

CORE TECHNICAL SKILLS

Languages: PHP, JavaScript, Golang, SQL

Backend & Frameworks: Laravel, Core PHP, RESTful APIs, MVC Architecture, Microservices

Frontend: React.js, Vue.js, HTML5, CSS3, Bootstrap, jQuery, AJAX

Databases & Caching: MySQL, PostgreSQL, Redis, Laravel Cache, Dragonfly DB

DevOps & Infrastructure: Docker, CI/CD, Linux, Apache, Nginx, Server Management, Web Application Deployment

Development Tools: Git, GitHub, Jira, VS Code, Postman, Sublime Text

Engineering: API Integration, Payment Gateway Integration, RBAC, Authentication & Authorization, Database Design, SQL Optimization, Caching, Application Security, Performance Optimization

PROFESSIONAL EXPERIENCE

Logelite PVT. LTD.

Full-Stack Software Developer | Lucknow, India | January 2022 – Present

- Develop and maintain scalable web applications, business portals, CRM systems, and advertising platforms using PHP, Laravel, React.js, and MySQL.
- Design and develop RESTful APIs using Laravel and PHP for web and mobile applications.
- Develop and maintain Advertiser, Publisher, and CRM panels for a high-traffic advertising platform supporting thousands of monthly users.
- Lead a 4-member development team in designing and implementing an Affiliate Program with real-time tracking and fraud-detection capabilities.
- Implement Laravel Cache and Redis caching strategies and backend performance optimizations to improve API response times and application performance.
- Use Docker-based development/deployment workflows and CI/CD practices to support consistent application builds, testing, and releases.
- Develop role-based applications with separate access controls for Admin, Employee, User, and Department-level users.
- Design and optimize MySQL and PostgreSQL databases, including schemas, complex SQL queries, joins, and data aggregation.
- Integrate third-party services, external APIs, payment-related services, and communication platforms.
- Implement authentication, authorization, input validation, API security, and SQL-injection prevention.
- Develop responsive frontend interfaces using React.js, JavaScript, HTML5, CSS3, Bootstrap, jQuery, and AJAX.
- Troubleshoot production issues, optimize existing modules, and deliver features based on business requirements.
- Use Git and Jira for source-code management, task tracking, team collaboration, and release management.

SSAK SOLUTION SERVICES PRIVATE LIMITED

Web Developer | Lucknow, India | October 2021 – January 2022

- Developed and maintained web applications using PHP, Laravel, JavaScript, MySQL, HTML, CSS, and Bootstrap.

- Developed backend modules and RESTful APIs for business applications and internal web solutions.
- Implemented database-driven features using MySQL, including CRUD operations, relationships, joins, and complex SQL queries.
- Developed responsive interfaces using JavaScript, jQuery, AJAX, HTML5, CSS3, and Bootstrap.
- Implemented authentication, authorization, and role-based access control for application modules.
- Integrated third-party APIs and external services; resolved application issues and optimized database queries.

SDH Infotech Pvt Ltd.

Web Developer | Lucknow, India | February 2020 – September 2021

- Developed web application modules using PHP, Laravel, JavaScript, MySQL, HTML, CSS, and Bootstrap.
- Implemented backend business logic and database-driven functionality using Laravel and PHP.
- Designed and optimized MySQL structures and developed complex SQL queries for application requirements.
- Developed reusable RESTful API endpoints for frontend-backend communication.
- Implemented role-based authentication and authorization and created responsive UI components.
- Worked with Git-based version control and participated in debugging, testing, performance optimization, and maintenance.

SELECTED PROJECTS

7Search PPC – Advertising Network

Technology: Laravel, React.js, PHP, MySQL, Redis, Laravel Cache, Docker, CI/CD, REST APIs

- Designed, developed, and maintained Advertiser, Publisher, and CRM panels for an advertising network platform.
- Developed scalable React.js frontend modules and Laravel/PHP backend services for campaigns, publisher management, reporting, and account workflows.
- Implemented Redis and Laravel Cache strategies, campaign tracking, reporting, user management, and high-volume application operations.

Affiliate Program

Technology: Laravel, React.js, PHP, MySQL, Redis, Laravel Cache, Docker, CI/CD, REST APIs

- Led development of an affiliate management platform with real-time tracking and reporting capabilities.
- Developed advertiser, publisher, affiliate, and campaign management modules with role-based access control.
- Integrated APIs and optimized caching, database operations, and backend processes for high-volume data processing.

Work Report Portal

Technology: Laravel, PHP, MySQL, JavaScript, Bootstrap

- Developed a role-based work management and employee portal with task tracking, leave management, attendance, and payroll-related modules.
- Built Admin and Employee dashboards with authentication, authorization, validation, and database-driven workflows.

Finance Portal

Technology: Laravel, PHP, MySQL, JavaScript, Bootstrap

- Developed a role-based financial and invoicing platform with invoice generation, payment tracking, financial dashboards, and user management.
- Designed database structures and optimized SQL queries for financial data.

Gym Management System

Technology: Laravel, PHP, Vue.js, MySQL, JavaScript, Bootstrap

- Developed a multi-department gym management system with parent, department, and user login modules.
- Implemented member management, communication, administrative workflows, responsive components, and Laravel APIs.

IP Geolocation & Location Tracking Service

Technology: Golang, PostgreSQL, MaxMind GeoIP, IPStack API, REST APIs

- Developed a scalable Golang service to identify and retrieve geographical information associated with user IP addresses.
- Integrated MaxMind GeoIP and IPStack for IP-to-location mapping and enrichment, including country, region, and city data.
- Designed PostgreSQL schemas and optimized IPv4/IPv6 lookup, validation, and high-volume record processing.

EDUCATION

Allahabad College of Engineering and Management, Kaushambi, U.P.

Diploma in Engineering | 2019
